Viseo acquires Homsys Group

05.05.10
Source: VISEO

VISEO announces the acquisition of HOMSYS and OBJET DIRECT companies. By doing so VISEO is building a unique positioning of multi-specialist in Information Systems.

VISEO, a company specializes in the implementation of ERP solutions, announces today the acquisition of the majority stake of HOMSYS group equity.

HOMSYS, a French leading consulting company focused on Business Intelligence, and OBJET DIRECT, recognized for its expertise on web and object-oriented architectures and technologies, join the VISEO group. The new group will offer to its customers a wide spectrum of services and expertise based on its multi-specialist's positioning.

VISEO will therefore be able to propose a complete solution to companies' current issues, either for key accounts or SMEs : **integration and optimization of the core business processes** through a panel of software solutions or through specific innovative developments and **company's monitoring and controlling** with decision-making and performance management solutions.

This operation answers the ambition of VISEO to adapt itself to the market evolutions: "*The environment is getting stabilized since the 2009 crisis and will gradually restart and move forward*", declares **Olivier Dhonte, Chairman and CEO of VISEO.** "*Our customers have reduced the number of their suppliers, while looking for sharp, specialized and expert skills. They look for reliable partners to support them on all their complex information systems issues. Through this acquisition, we strengthen our positioning and we plan to be a central leader and a reference on the market*".

Yves Cointrelle, Chief Executive Officer of HOMSYS, explains: "*Expected on both sides, made easy by successful partnership and collaboration experiences, this operation materializes an industrial project that became obvious.*"

Franck Priore, Chief Executive Officer of OBJET DIRECT, sees in it "*A fascinating project both from an industrial perspective as well as from a human perspective!*" He pursues: "*The values that we share with VISEO, combined with the same quality standards for our customer service expectations, make us extremely confident in the perception that our customers will have with this new value proposition.*"

With this acquisition, VISEO will represent 500 employees, realizing more than 52 M€ of turnover. The group will benefit from a new growth dynamic, through the diversification of its geographical location and a better management of its Master Service Agreement and know-how.

About VISEO

www.viseo.net

Created in 1999, the VISEO group has since the last 10 years specialized in the implementation of ERP solutions. With its expertise matured on SAP and Microsoft solutions, the two strong market leaders, VISEO offers dedicated solutions to these market segments: key accounts, key accounts subsidiaries and also SME.

The VISEO group is spread over 7 locations in France (Paris, Lyon, Grenoble, Marseille, Toulouse, Bordeaux and Morlaix) and over 5 subsidiaries abroad (Casablanca, Munich, Hong-Kong, Singapore and New York), in order to support the international development of its international customers.

In 2010, VISEO becomes the first multi-specialist actor on information systems (software packages, Business Intelligence, object and web architectures and technologies) by integrating HOMSYS companies (Business Intelligence specialist) and OBJET DIRECT (object and Web technologies specialist).

About HOMSYS group

www.homsys.com | www.objetdirect.com

Homsys is an independent French group, providing consulting and specialized IT services around two areas:

- Business Intelligence (Homsys)
- Object and Web technologies (Objet Direct)

Homsys, ranked among the French TOP 5 actors specialized in Business Intelligence. Homsys rests its expertise on 17 years of experience in the implementation of performance monitoring, management and

decision-making tools and more than 600 Business Intelligence projects, realized with industry and service key accounts, with the most successful software solutions.

Objet Direct is a French leading IT consulting firm dedicated to web, object-oriented & agile software development, to support CIOs in monitoring their specific development projects, from the conception to the application deployment. Thus Objet Direct makes a concrete the link between consulting and the realization of projects to help companies optimize their information systems, their software development methods and their core business processes.
